Email Hosting

Only £9.49 per month

Microsoft® **Exchange Server** 2010

Exchange 2010 Mailboxes

Maintenance on an in-house Exchange server can be daunting and very expensive. Anything can happen from viruses, drive failures, corrupt databases, server patches and the list goes on. Then you have to hire someone to manage it and be ready to purchase all the hardware. Our hosted email makes it simple for you and we setup everything, so all you have to do is check your mail.

Microsoft Exchange 2010 is a messaging and collaboration solution designed to help your team communicate more efficiently. Upgrading from Exchange 2003 and 2007 provides improved security of remote and mobile access as well as high reliability and enhanced performance, significantly boosting productivity.

You can use Microsoft's Outlook Anywhere to gain fully functional access to your Exchange mailbox from any location or device. In addition, ActiveSync enables users to receive emails, real-time calendar and contact information on their mobile devices with no cost for the amount of data synced. This will help your colleagues organise emails and prioritise tasks whilst they are out of the office. Data is securely backed up every day and you can easily recover messages for up to 30 days so you can be confident in the fact that your data is completely safe with us.

Only £9.49 per mailbox, per month
